

Mag-Fix™

Made from a permanent magnetic material and a plastic binder, Mag-Fix™ magnetic strips allows, among others, to fix any print medium including paper print media on metallic surfaces or to label any metal shelves and cabinets in seconds. Very easily cut with scissors, this range of flexible materials offers many opportunities for creative displays.

Mag-Fix™ magnetic strips are available in different versions and formats with different magnetic properties.

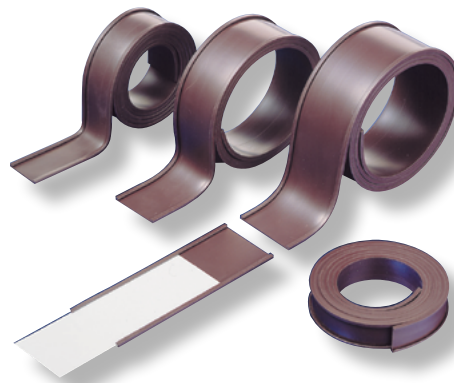

■ Coloured and plain magnetic strips

In addition to the plain version, the strips are available in different colours and have the same magnetic properties as magnetic sheets.

■ Self-adhesive magnetic strip

Double-sided magnetic strips enable you to fix non magnetic media on magnetic receptive surfaces, in seconds.

■ Magnetic C Profiles

C profiles are great for labeling metallic shelves. Available in rolls and can be cut to size upon request.
